1 Administration

1.1 Update of internally used software

As of the release 2026.6, the following internally used software has been updated.

- **Google Web Toolkit („GWT“)**
Update from version 2.12.2 to version 2.13.0
- **libwebp**
Update from version 1.3.2 to version 1.6.0
The SharpYUV encoding (`useSharpYUV=true`) was corrected, as it was previously not applied correctly.
- **Spring Boot**
Update from version 4.0.3 to version 4.0.6
 - CXT Platform
 - ContentCreator
 - Template Development MicroApp
 - Multisite Management
 - Collaboration

Please note the general advice that when developing modules or scripts, only the **FirstSpirit API** should be used. When using third-party libraries, they should be integrated as "isolated".

2 FirstSpirit Content Experience Tools (CXT)

2.1 Latest module versions

FirstSpirit 2026.6 supports the following module versions for FirstSpirit Content Experience Tools.

Module / file name	Version number
FirstSpirit CXT Plattform	8.0.2

platform-[version].fsm	
FirstSpirit Media DAP	2.0.0
mediadap-[version].fsm	
FirstSpirit PageRef DAP	2.0.0-1
pageref-[version].fsm	
FirstSpirit Image Assistant	1.1.2
imagerecognition-module-[version].fsm	
FirstSpirit Analyze Assistant	2.0.2
FirstSpirit-AiAnalyze-[version].fsm	
Template Development MicroApp	1.0.2
fs-sitedev-microapp-[version].fsm	
FirstSpirit Multisite Management	2.0.3
fs-multisite-[version].fsm	
FirstSpirit Collaboration (Beta)	1.1.4
fs-collaboration-[version].fsm	

3 Module: Collaboration

3.1 Comment editing in FirstSpirit Collaboration

In the [Collaboration Report](#), comments in conversations can now be edited retrospectively. Edited messages are marked with a "Last edited" timestamp, and changes are immediately visible to other users. The new method `MessageAgent#update` is available via the [API](#).

4 Module: Multisite Management

4.1 API for MSM bundles

A new API for managing bundles has been introduced for Multisite Management. Bundles can be created, edited, deleted, and their subscriptions and elements managed via the new `BundleAgent`.

For further information, please also see the [documentation](#).

5 Deprecations

For Crownpeak, an important goal in software development is to avoid introducing incompatibilities and migration expenditures related to updating from one FirstSpirit release to the next as much as possible or to compensate for these within the software. FirstSpirit updates should generally be deployable with little effort or able to be carried out in a fully automated fashion.

However - not least in order to ensure maintainability and to future-proof the software - e-Spirit cannot fully avoid replacing existing functionality with new mechanisms. In the future, functionality that will be removed from the software will be listed in this section, including the date at which time the functionality will be removed.

Functionality	Deprecated as of	Will be removed/ Was removed as of
Input component CMS_INPUT_CONTENTAREALIST	5.2R3	
Input component CMS_INPUT_CONTENTLIST	5.2R3	
Input component CMS_INPUT_FILE	5.2R3	
Input component CMS_INPUT_LINKLIST	5.2R3	
Input component CMS_INPUT_OBJECTCHOOSE	5.2R3	
Input component CMS_INPUT_PAGEREF	5.2R3	
Input component CMS_INPUT_PICTURE	5.2R3	
Input component CMS_INPUT_TABLIST	5.2R3	
FirstSpirit Access API: de.espirit.firstspirit.agency.GroupsAgent	5.2R15	
FirstSpirit Access API: delete (de.espirit.firstspirit.access.AccessUtil)	5.2R18	
FirstSpirit Access API: release (de.espirit.firstspirit.access.AccessUtil)	2018-06	
FirstSpirit Access API: getLastLoginAsDate (de.espirit.firstspirit.agency.UserStatisticsAgent)	2018-07	

Functionality	Deprecated as of	Will be removed/ Was removed as of
FirstSpirit Access API: getLostAndFoundStoreNodes(); (de.espirit.firstspirit.feature.FeatureInstallResult)	2018-10	
FirstSpirit Access API: getDeletedStoreNodes(); (de.espirit.firstspirit.feature.FeatureInstallResult)	2018-10	
FirstSpirit Access API: de.espirit.firstspirit.access.store.Previewable	2019-01	
WebSphere Application Server support for FirstSpirit	2019-05	
FirstSpirit Access API: redirectTemplateLogToDefaultLog() (Interface RenderingAgent.Renderer)	2021-05	
Omnichannel Manager 2.x	2025-01	

6 Overview

ID	Description	Categories
CORE-16614	When creating remote data configurations, the dialog now provides more hints about the reasons preventing the import of a schema.	Remote Data
CORE-17203	FirstSpirit Collaboration now allows editing comments. Further information can be found in chapter “Module: Collaboration: Comment editing in FirstSpirit Collaboration”.	Collaboration
CORE-17720	During updates via Multisite Management (MSM), language-dependent form field values in the target project were not correctly overwritten when the corresponding values in the source project were empty or never set. This behavior has been corrected for MSM. Empty values from the source project now overwrite existing values in the target project. For ContentTransport and External Synchronization, a new option <code>importEmptyFormFields</code> has been introduced, which can be enabled if needed (default: disabled, previous behavior remains unchanged).	Content Transport, External synchronization, Multisite Management

ID	Description	Categories
CORE-17788	<p>New API for MSM Bundles</p> <p>Further information can be found in chapter “Module: Multisite Management: API for MSM bundles”.</p>	FirstSpirit API, Multisite Management
CORE-17804	For web applications provided by Crownpeak, such as the Server-Monitor, several potential security vulnerabilities in authentication have been addressed.	Security, Server Administrator
CORE-17867	A problem with database deadlocks and MS SQL Server in archiving tasks has been resolved.	Tasks
CORE-17894	The JSON output for unreachable dataset references (FS_DATASET, FS_INDEX) has been improved when <code>brokenReferenceRendering</code> is enabled.	Support for JSON
CORE-17909	Dependencies in the FirstSpirit Image Assistant have been updated to address known security vulnerabilities: <code>Gson</code> was upgraded from 2.8.2 to 2.8.9, and the <code>AWS SDK</code> from 2.42.8 to 2.42.37, which also updated the transitive <code>Netty</code> dependencies.	Image Assistant
CORE-17946	<p>FirstSpirit Content Experience Tools: Latest module versions</p> <p>Further information can be found in chapter “FirstSpirit Content Experience Tools (CXT): Latest module versions”.</p>	FirstSpirit Content Experience Tools (CXT)
CORE-17949	When setting the <code>clientCookieNames</code> option, there could be an incompatibility with Tomcat 11 because the cookie format specified in RFC 2109 is no longer supported by this Tomcat version. With the current release, it is ensured that the format from RFC 6265 is used.	Server Administrator
CXT-3768	Update of internally used software	Integrated software
CORE-17926 CXT-3779	Further information can be found in chapter “Administration: Update of internally used software”.	
CXT-3775	A problem was fixed where page-related notifications (<code>WebeditStatusNotePlugin</code>) were not always displayed correctly.	ContentCreator
CXT-3783	In block formats in the DOM editor, frame boxes are now displayed again following customer feedback on the visual refresh.	ContentCreator
