2 AI-powered tools

2.1 Announcement: New default model for the AI Suite - GPT 5.6

With the upcoming FirstSpirit 2026.11 release, the default model of the AI Suite will be updated to GPT 5.6.

If you use your own connection, please ensure the availability of the GPT 5.6 models Luna and Terra. If you use our OpenAI connection, you do not need to do anything further.

3 Deprecations

For Crownpeak, an important goal in software development is to avoid introducing incompatibilities and migration expenditures related to updating from one FirstSpirit release to the next as much as possible or to compensate for these within the software. FirstSpirit updates should generally be deployable with little effort or able to be carried out in a fully automated fashion.

However - not least in order to ensure maintainability and to future-proof the software - e-Spirit cannot fully avoid replacing existing functionality with new mechanisms. In the future, functionality that will be removed from the software will be listed in this section, including the date at which time the functionality will be removed.
